

## *Stala* Integrated Assemblies, LLC.

**Vision:** *Stala* is the preferred provider of door and window assemblies to Commercial ICF Construction.

In the past, window and door openings in Commercial ICF's have been a stumbling point. The conventional means to finish an ICF opening were very time and labor intensive. In order to capitalize on the speed in which ICF's can be constructed, a new integrated approach to openings was needed.

The Stala Integrated Assembly is proud to present a visionary solution for ICF openings, which dramatically reduces labor and time. We are a heavy-duty assembly that will perform way beyond "bucking" to coordinate with project design, installers, materials and various trades.

### **Stala : Systems to Assemble, Link and Align ICF Construction**

- Fully-welded door and window frames delivered direct to each jobsite, ready for placement.
- True and consistent openings every time.
- An incorporated airspace return to maximize energy efficiency.
- No additional hollow metal framing needed, we are your finished HM frame.
- ICF alignment and increased wall integrity.
- Built-in vibrator pockets at window sills to ensure good concrete consolidation.
- Hardware preparations standard for door and window installation.
- Façade enclosure and drywall returns are standard options.
- Accepts all window and door designs.
- Compatible with all ICF Manufacturers.
